Safe to use on non-porous hard surfaces

No build-up on the surface or streaking

Contributing to overall faster contact time

Rapid action against viruses, bacteria & fungi

AEROSEPT

Alcohol-QAC based Instant Surface Disinfectant

Alcohol-QAC formulations are safe to use on non-porous hard surfaces. With repeated use, one does not experience build-up on the surface or streaking. They are not corrosive to metals. Alcohols have rapid action against vegetative forms of bacteria, fungicidal, and virucidal. With the addition of alcohol to the quaternary ammonium chlorides, killing time for microorganisms is faster thus contributing to overall faster contact time.

Salient Features

- Alcohol-based instant spray disinfectant
- Ready-to-use spray & wipe
- Highly effective with a pleasant fragrance
- Non-residual nature
- Non-tainting & non-staining

Areas of Application

- Hospital tables ● Dental Chairs ● OT equipments
- Nebulizer ● Stethoscope ● ECG monitor ● NICU pump
- Respirator and AVD units ● Clinical thermometer
- Pulse oximeter ● Incubators ● Hospital beds ● Tabletops
- Consulting rooms ● Airspace between patients ● Doorknobs
- Handles ● Mobile phones ● Car steering wheels ● Keyboards

All hard contact surfaces and equipment in regular human contact manifesting broad-spectrum bactericidal, fungicidal and virucidal attributes.

Pack Size
250mL, 500mL
& 5L
